

# BRIDE Project

## (Biodiversity Regeneration in a Dairying Environment)

### Overview

- EIP-AGRI **results-based** project funded by DAFM/EU
- Livestock / tillage / equine farmers maximising biodiversity enhancement within their individual farms
- Targeted measures for biodiversity improvement, water quality and carbon reduction at farm & landscape scale

### Aims

- Improve biodiversity and environmental awareness on intensive Irish farmland
- Reward environmental performance and highlight this nationally
- Facilitate market rewards for sustainability
