

N strategy & grazing management

Managing white clover on your farm

- ❖ Measure farm cover
- ❖ Spring rotation planner
 - 66% grazed by 17th March
- ❖ Grass wedge
- ❖ Autumn budget & planner

Mid-season management

- 1,300 - 1,500 kg DM/ha pre-grazing yield
- 18 – 21 day rotation
- 4 cm post-grazing sward height

N fertiliser application strategy - 150 kg N/ha

Date (rotation)	N rate (kg N/ha)
February	14 (+ slurry)
Mid-March	35
April (2 nd)	29
Early May (3 rd)	9
Late May (4 th)	9
June (5 th)	9
Early July (6 th)	9
Late July (7 th)	9
August (8 th rot)	9
Mid-September	18
