

What is required to achieve consistently low TBC and thermoduric counts?

Clean environment

Keep yards and roadways clean

Clean cows

Clip tails 3 times/ year

Hygiene at milking

Attach clusters to clean, dry teats

Regular maintenance

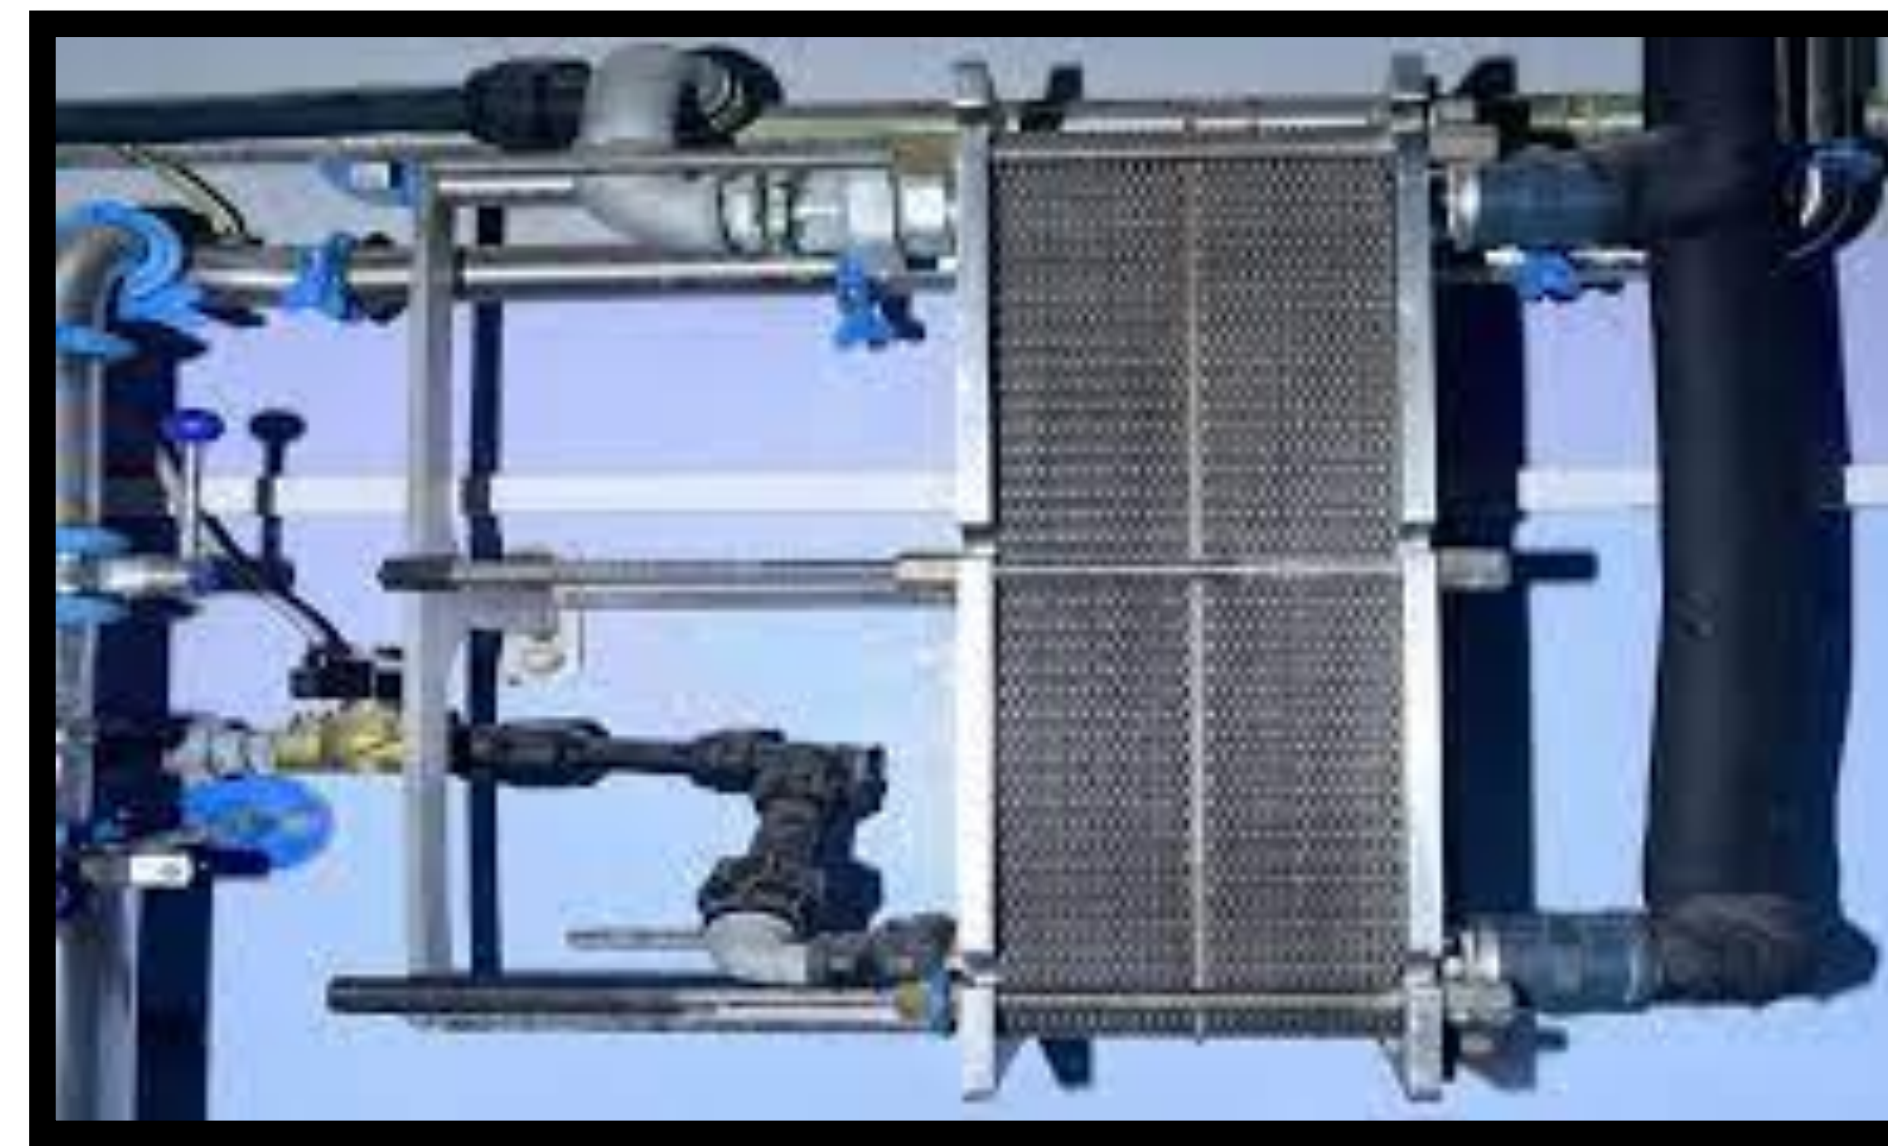

Change rubber ware routinely & immediately if damaged

Effective wash routine

Minimum of 7 hot washes and 2 acid washes / week

Fast and efficient milk cooling

Cool milk to 3.5 - 4°C quickly

Take home message

- **Clean environment**
- **Clean teats**
- **Fast cooling**
- **Effective wash routine**
