

Historical

Grass growth calculated from covers entered into PastureBase Ireland (PBI) over the previous 7 days
➡ historical information – need to look into future

Prediction

Growth specific for single farm based on:

- Soil type
- N Fertiliser applied
- Cover/grass management
- Weather: historical and forecasted

Where to find growth predictions

- Weekly farmer forecast

- Social media

Take home messages

- The trend is more important than the number!
- Before the end of the year, prediction in PBI for users with:
 - More than 25 covers
 - Up-to-date fertiliser information
