

Nutrient Management

- **Similar N up until early May – low levels of N fixed by clover until May**
- **Sulphur applied from April – 10 units/cut & 10-16 units S/ac by July**
- **Reduce/Replace fertiliser N in paddocks with adequate clover content (>20%)**
- **Use watery slurry mid-season on high clover paddocks**

April Clover Content (%)	Feb/Mar	April	May	June	July	Aug/Sept	Total
	Chemical Fertiliser kg N/ha (units/ac)						
Grass Only Sward	28 (22)	28 (22)	28 (22)	18 (14)	28 (22)	20 (16)	150 (120)
5 %	20 (16)	20 (16)	20 (16)	10 (8)	10 (8)	20 (16)	100 (80)
10 %	20 (16)	20 (16)	10 (8)	0 (0)	10 (8)	15 (12)	75 (60)

***Watery slurry can replace some of the fertiliser N**
