National Centre
for Agri-food
Climate Research
& Innovation

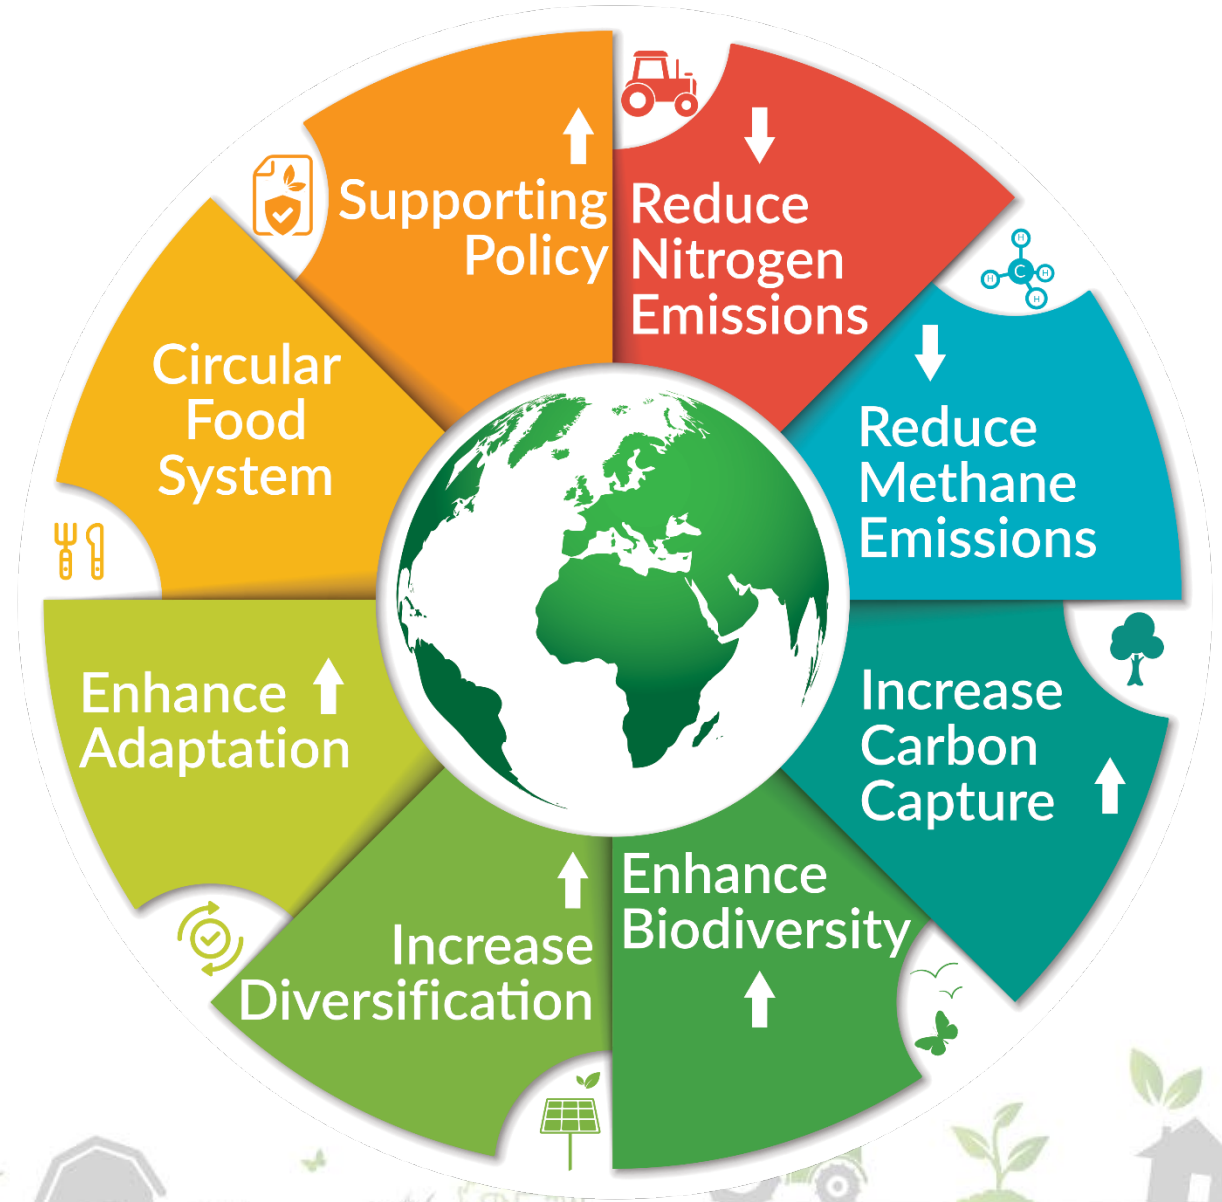

What will the National Centre for Agri-Food Climate Research & Innovation look like?

A Virtual Centre that will coordinate research across Teagasc, nationally and internationally

What will be
the key areas
of action
within
the Centre?

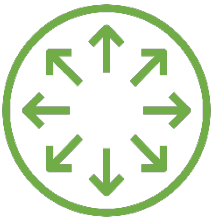

Advantages of the Virtual Centre in Climate Change

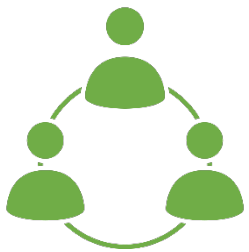

National Focal Point

for agriculture related mitigation solutions to climate change

Increase Teagasc capacity

related research - people, infrastructure and capacity

Greater co-operation

across Teagasc research and KT programmes

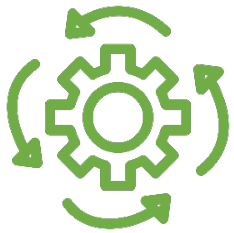

Advantages of the Virtual Centre in Climate Change

Better able to **inform national policy** with regards to agriculture climate mitigation options

Better position to develop **national and international collaboration**

Greater efficiency in terms of the use of resources-human, facilities and data platforms
