

Demonstration Farmer Update from Gerry & Niall Moloney

25 Feb 2022

Cows calved: 65%

Percentage grazed: 12%

Farm cover: 1069 kg DM/ ha

Winter growth: 6 kg DM/ ha

Cows on-off grazing

Cow supplementation: 4 kgs indoors

3 kg at grass

Current Management

- 2500 gallons of watery slurry spread by LESS or 20 units of protected urea on 75% of milking block in late January
- Protected urea as the source for N fertilizer
- Targeting getting slurry on silage ground next week
- Will be spraying off ground for reseeding in mid to late March
- Will be incorporating red clover into reseeding
