

# Teagasc Heavy Soils Programme

## Land Drainage

IGUK Conference-14<sup>th</sup> October 2015

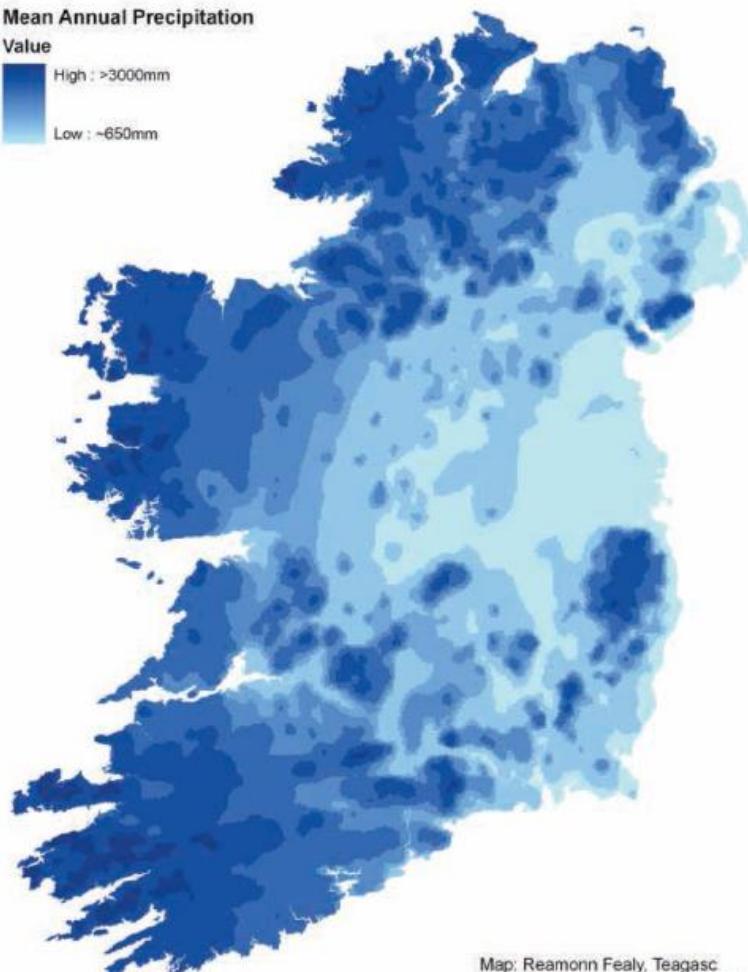

# Background: Climate

Mean Annual Precipitation

Value

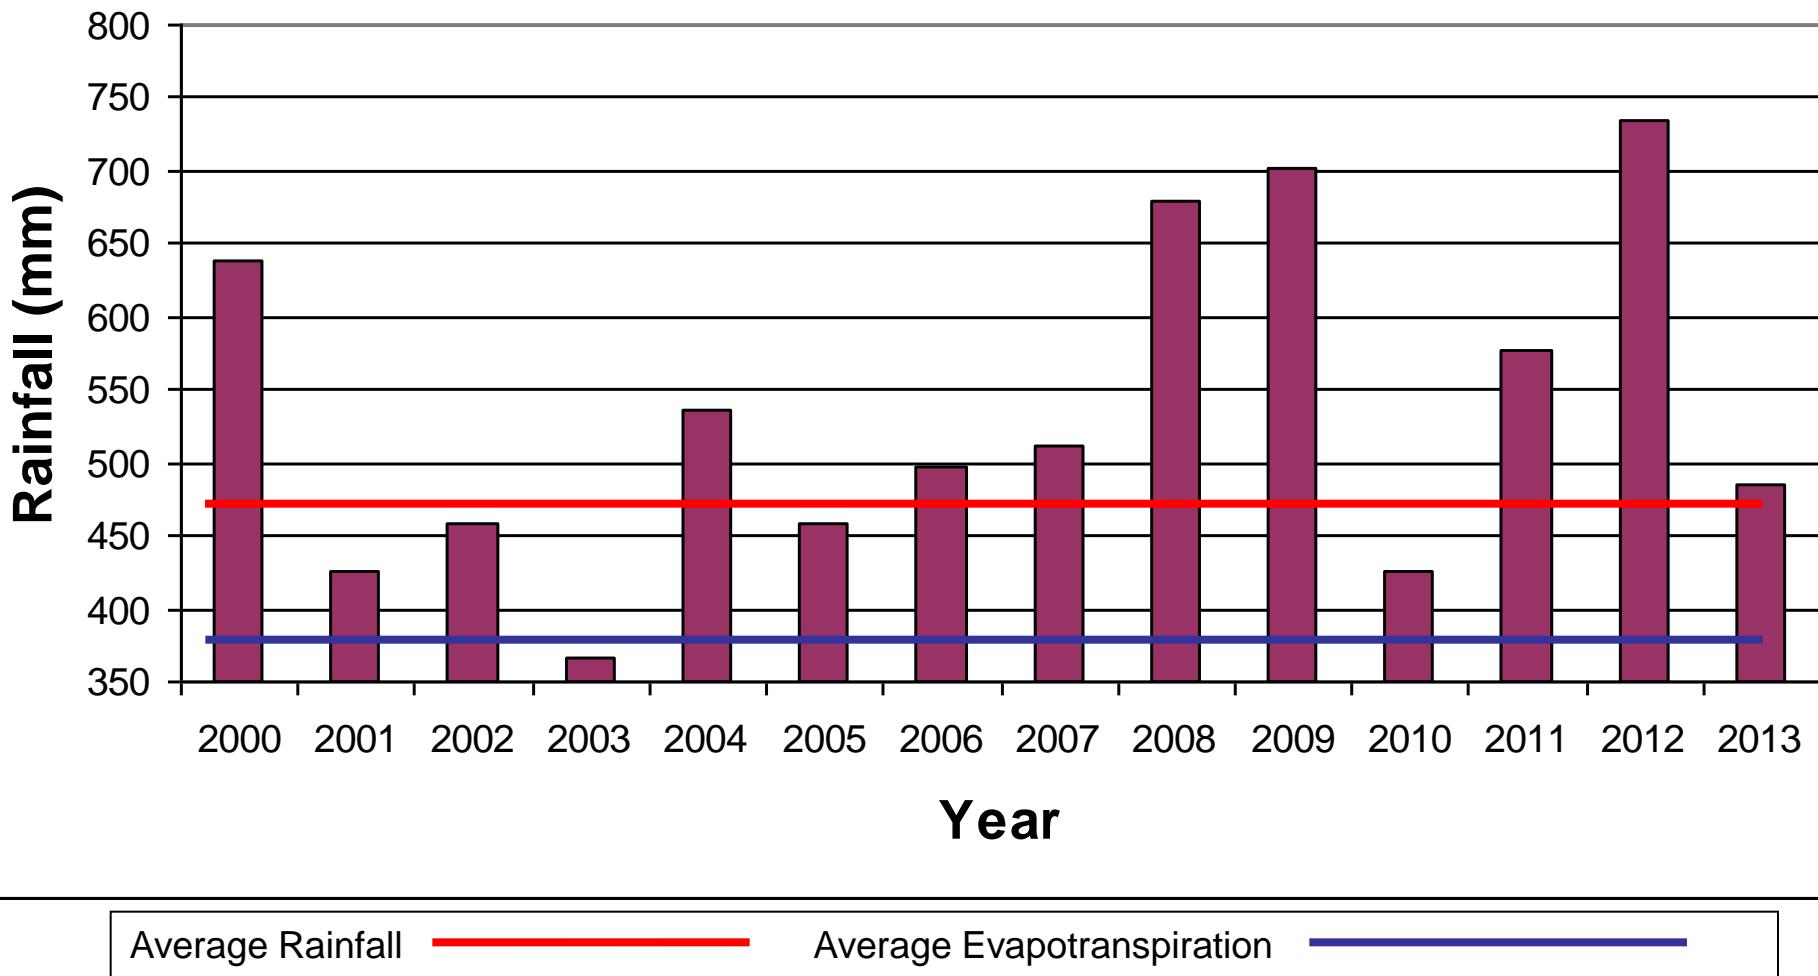

High : >3000mm

Low : ~650mm

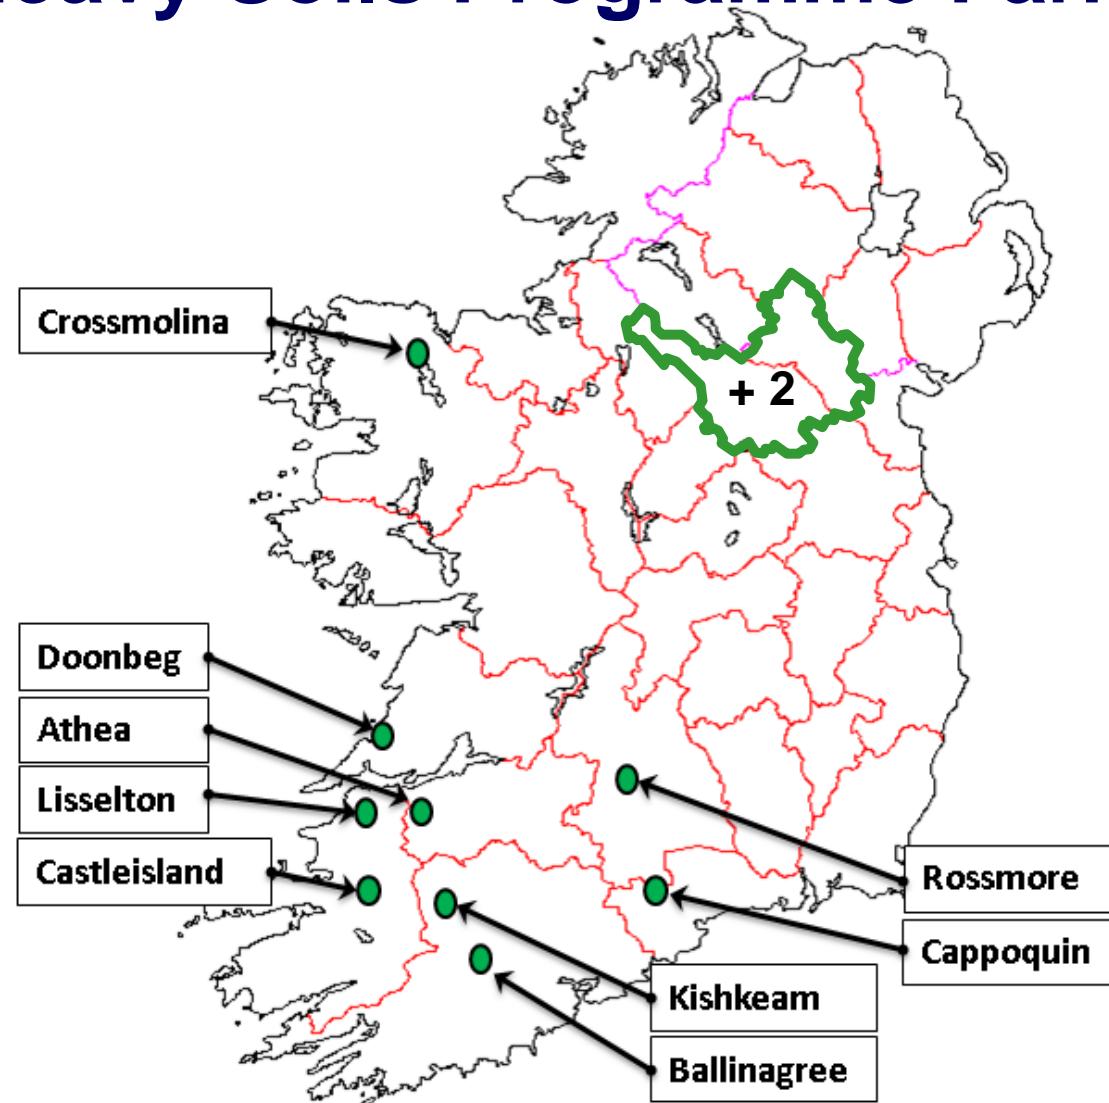

Map: Reamonn Fealy, Teagasc  
Data processing: Rowan Fealy, NUIM  
Data: Met Eireann

# Castleisland rainfall (April-September)

# Heavy Soils Programme Farms

# Types of drainage system

- Two principle types are distinguished:

- Groundwater drainage system:**

- A network of piped drains exploiting permeable layers. (***Collects groundwater***)

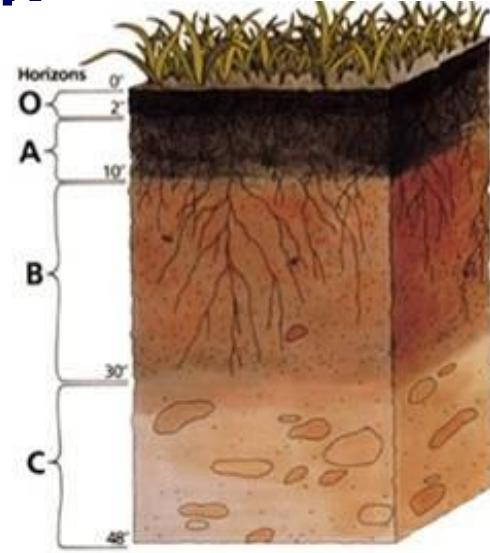

- Shallow Drainage system:**

- Where movement of water is impeded at all depths. (***Collects surface water***)

# Planning a drainage system

- Before planning a drainage system the causes of poor drainage must be understood
- No “one size fits all” solution
- Test pits are dug within the area to be drained
- In test-pits
  - Establish soil type-varying with depth
  - Record depth and rate of water seepage
- Where is water impeded; where is water moving?

# Range of Soils

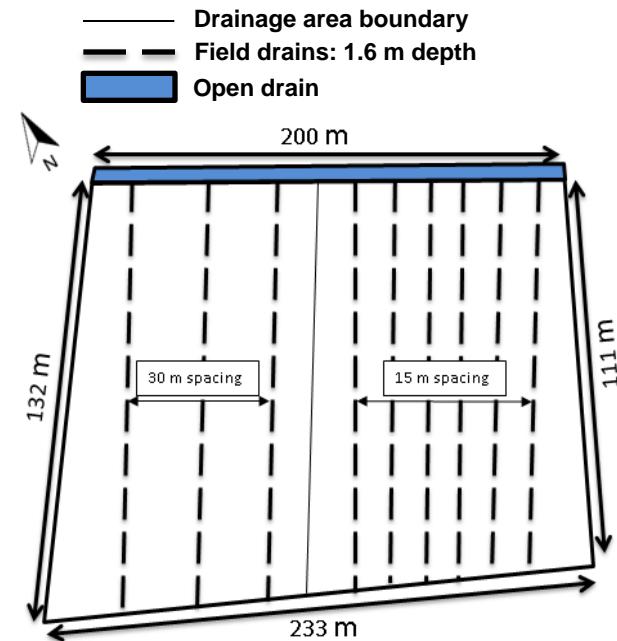

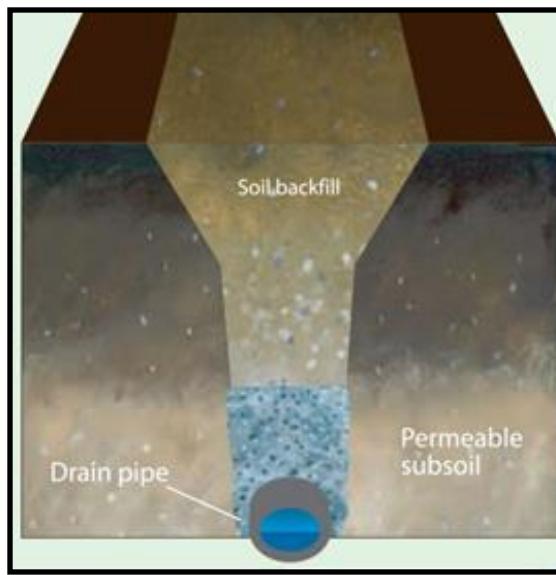

# Rossmore: Groundwater drainage system

## Soil Test pits

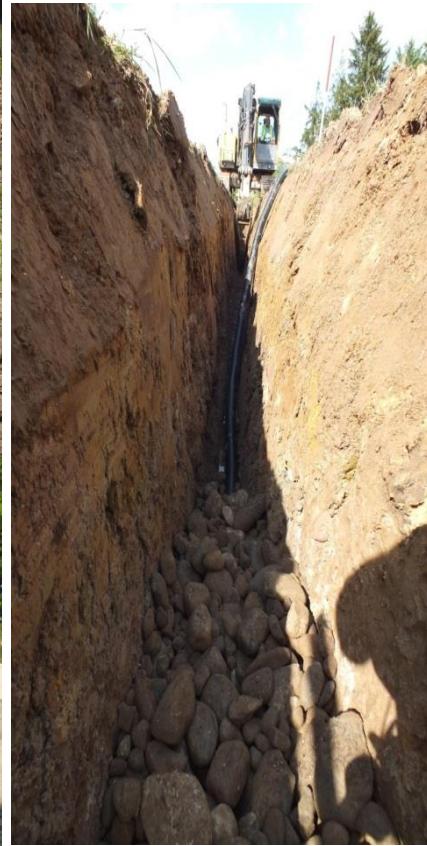

## Drainage System and Layout

- Where a permeable layer will transmit water
- Where water can percolate to watertable
- Most effective way to discharge groundwater

# Rossmore: Groundwater drainage work and costs

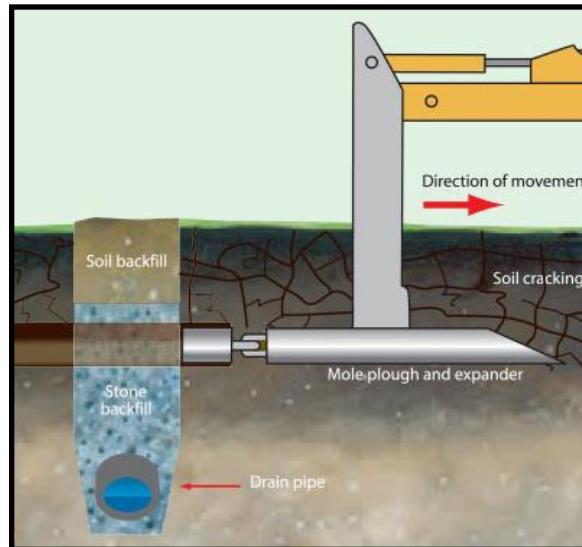

Costs	Total/ha
Drain installation @ €45/hr (55 hrs)	€2,476
Drainage pipe @ €0.70/m (429 m)	€300
Drainage stone @ €11.10/t (141 t)	€1,562
<b><u>Drainage cost</u></b>	<b><u>€4,338</u></b>

# Doonbeg: Shallow drainage system

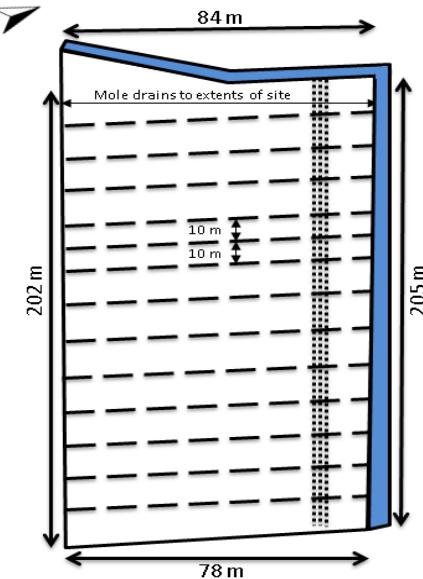

## Soil Test pits

## Drainage System and Layout

— Field drains: 0.9 m depth, 15 m spacing  
····· Mole drains: 0.6 m depth, 1.4 m spacing  
■ Open drain

Aim to crack the soil

Dependent on:

- Soil clay content (>40%)
- Weather conditions
- Used in tandem with collector drains

# Doonbeg: Shallow drainage work and costs

Costs	Total/ha
Drain installation @ €40/hr (66 hrs)	€2,639
Drainage pipe @ €0.80/m (688 m)	€550
Drainage stone @ €13.48/t (197 t)	€2,650
Mole installation	€100
<b><u>Drainage cost</u></b>	<b><u>€5,939</u></b>

# Measurement of water balance (15 min. intervals)

# Three weather warnings issued by Met Eireann

Friday 11th September 2015

Unsettled weather into next week

Met Éireann issues Status Orange rainfall warning

## Heavy rain causes flooding across the country

There is an orange rainfall warning in Clare, Cork, Kerry, Limerick and Tipperary.

Updated 9.33pm

HEAVY RAIN THIS evening has caused flooding in a number of areas across the country.

Just when we thought we might see some September sun, our hopes were quickly dashed by autumn's first weather warning.

There is currently an orange rainfall warning in effect in Clare, Cork, Kerry, Limerick and Tipperary.

## MET ÉIREANN ISSUES WEATHER WARNINGS AS WEEKEND APPROACHES

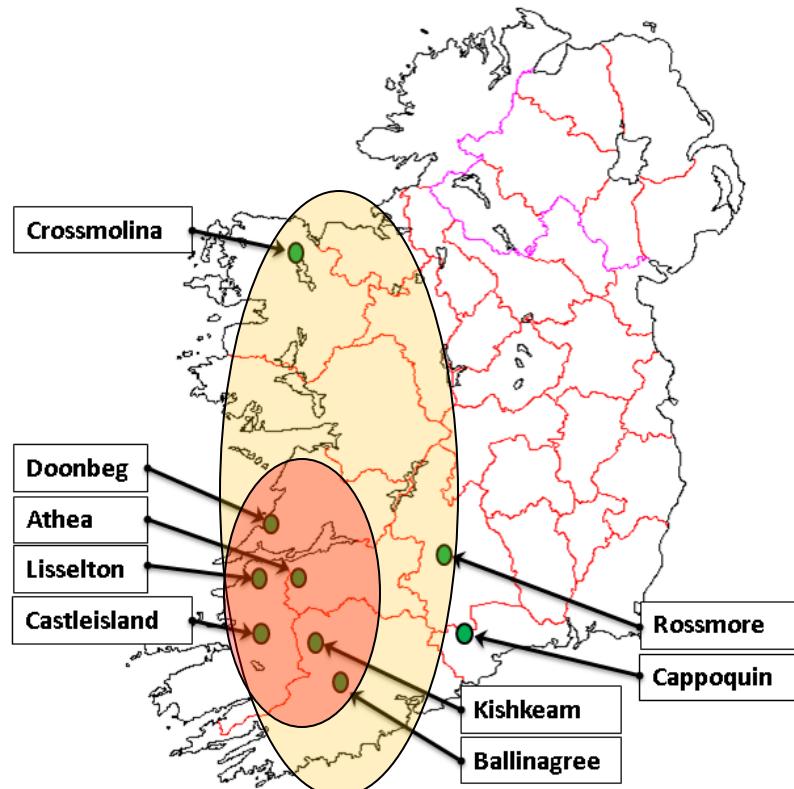

**Met Éireann has issued a number of weather warnings which suggest, *as predicted yesterday*, it's going to be a very wet start to the weekend.**

There is a Status Orange rainfall warning in place for Clare, Connacht, Cork, Kerry, Limerick and Tipperary as heavy, thundery showers are expected in these areas today.

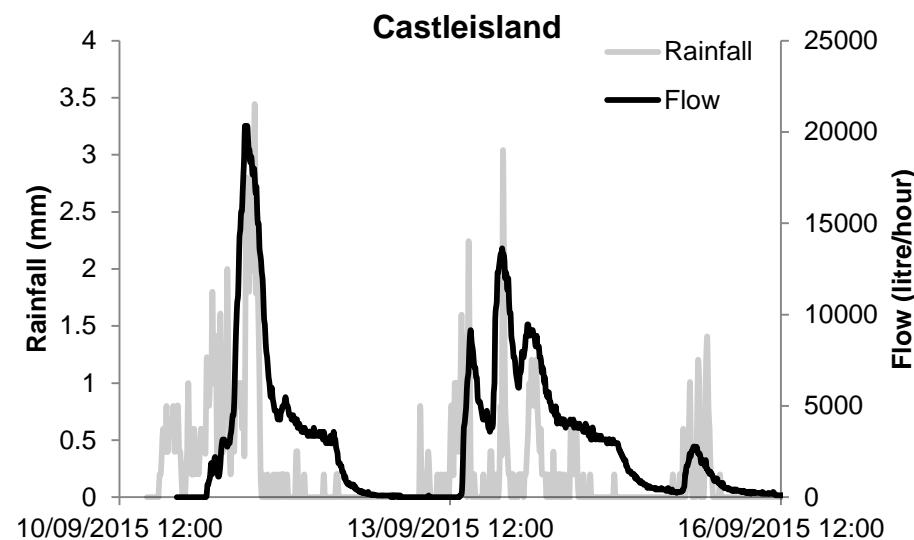

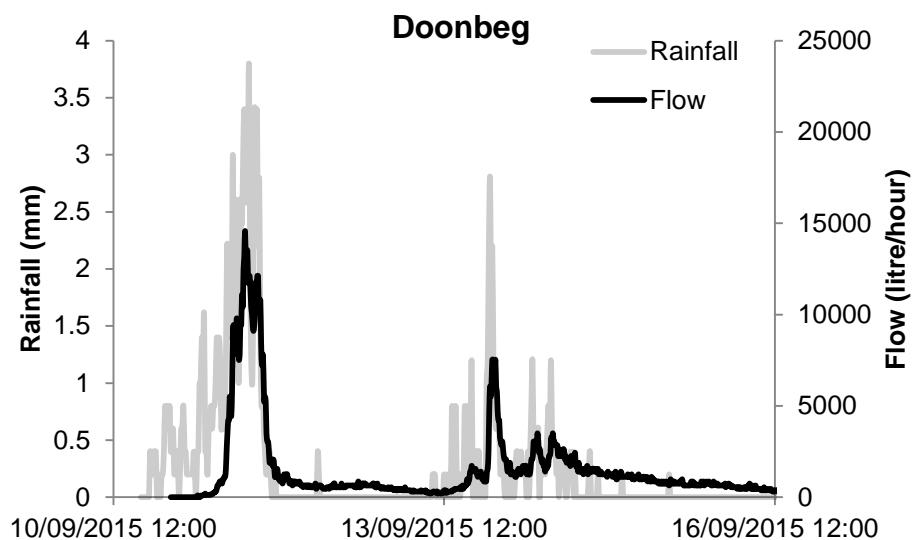

# September 11<sup>th</sup> -15<sup>th</sup> 2015: Rainfall

Farm	Rainfall
Doonbeg	156.6 mm (6.2")
Ballinagree	147.4 mm (5.8")
Kishkeam	143.8 mm (5.7")
Lisselton	139.6 mm (5.5")
Castleisland	129.9 mm (5.1")
Athea	125.6 mm (4.9")
Crossmolina	64.4 mm (2.5")
Rossmore	45.6 mm (1.8")

# September 11<sup>th</sup> -15<sup>th</sup> 2015: Flow Response

Area Drained	Total Volume Rainfall (L)	Total Volume drained (L)	Proportion drained (%)
1600 m <sup>2</sup>	250,560	201,670	81%

Area Drained	Total Volume Rainfall (L)	Total Volume drained (L)	Proportion drained (%)
5750 m <sup>2</sup>	746,925	417,410	56%

# Thanks for your attention
