

Successful Upland Livestock Systems

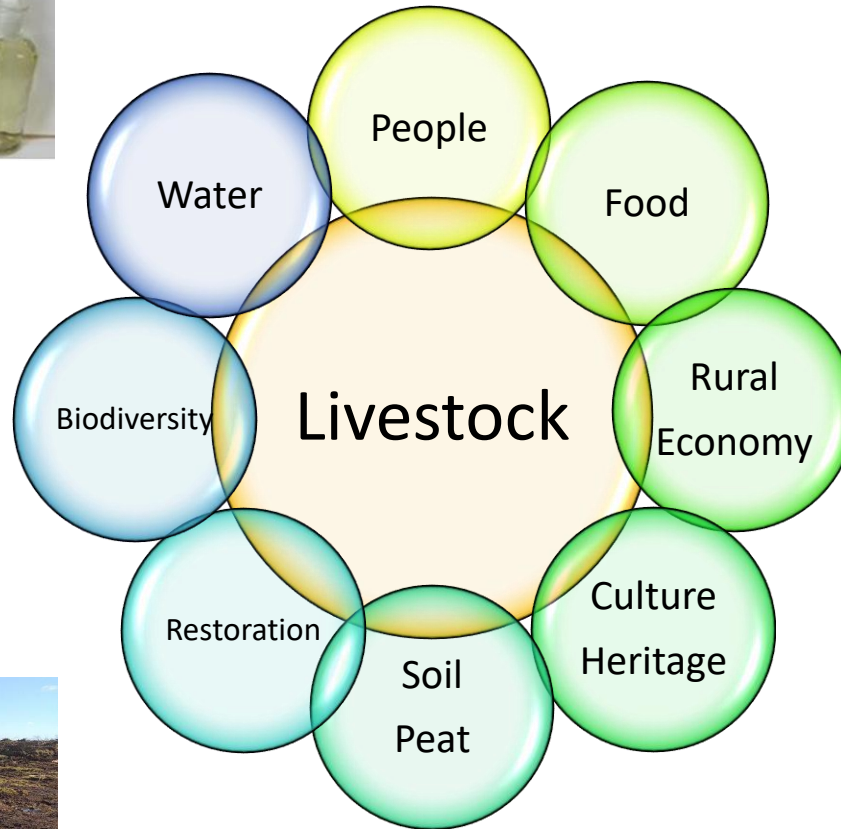

Dr. Eileen
McCloskey
CAFRE

Achieving success

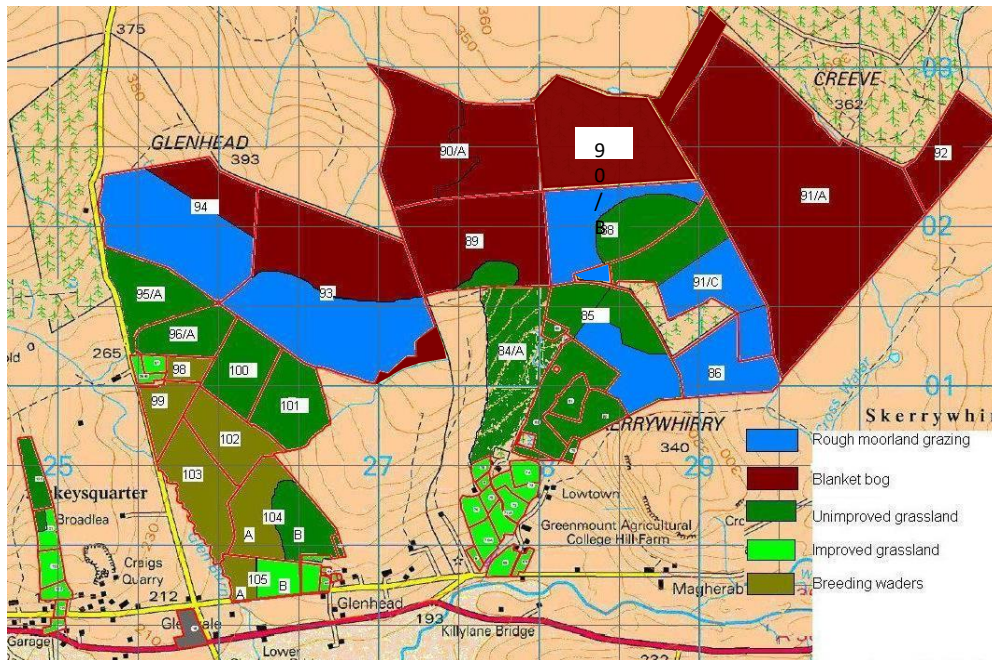

- Uplands offer much to society with the potential to deliver so much more
- A living landscape created through human activity
- Its uniqueness will offer multiple benefits

Integral role of livestock in the uplands

Develop sustainable enterprises which will successfully manage and enhance the biodiversity of the wide range of habitats present on the farm.

How do we achieve success?

Define what we are aiming to achieve

Establish appropriate management systems

Identify the most suitable livestock to manage it

Develop systems to measure and monitor progress

Thank you for Listening
