PUBLIC R&D : FOOD INDUSTRY NEEDS

60 YEARS OF HERITAGE

With 60 years of heritage behind us, the ABP way is to look to the future - to lead and to innovate.

Beef/Lamb

Processing **1,000,000** cattle & **1,000,000** sheep each year
Largest processor of beef in Ireland and the UK, and one of the top 3 in Europe.

Ingredients

Processing the by-products from ABP's beef/lamb processing business into organic fertilizer, pet food proteins, alternative biofuel , gelatine bone chips and a range of other products.

Food Group

Across 4 Divisions

€3.5 billion

5,000 colleagues

C&D FOODS

One of Europe's leading manufacturers of private label pet food, producing 570,000 tonnes every year from 7 facilities including pouch, alutray, canned & dry formats.

The largest collector of used cooking oil in the UK and Ireland. Our efficient and traceable waste management service converts waste streams from over 50,000 customer premises into renewable energy.

olleco
Supply. Collect. Convert.

Food Group

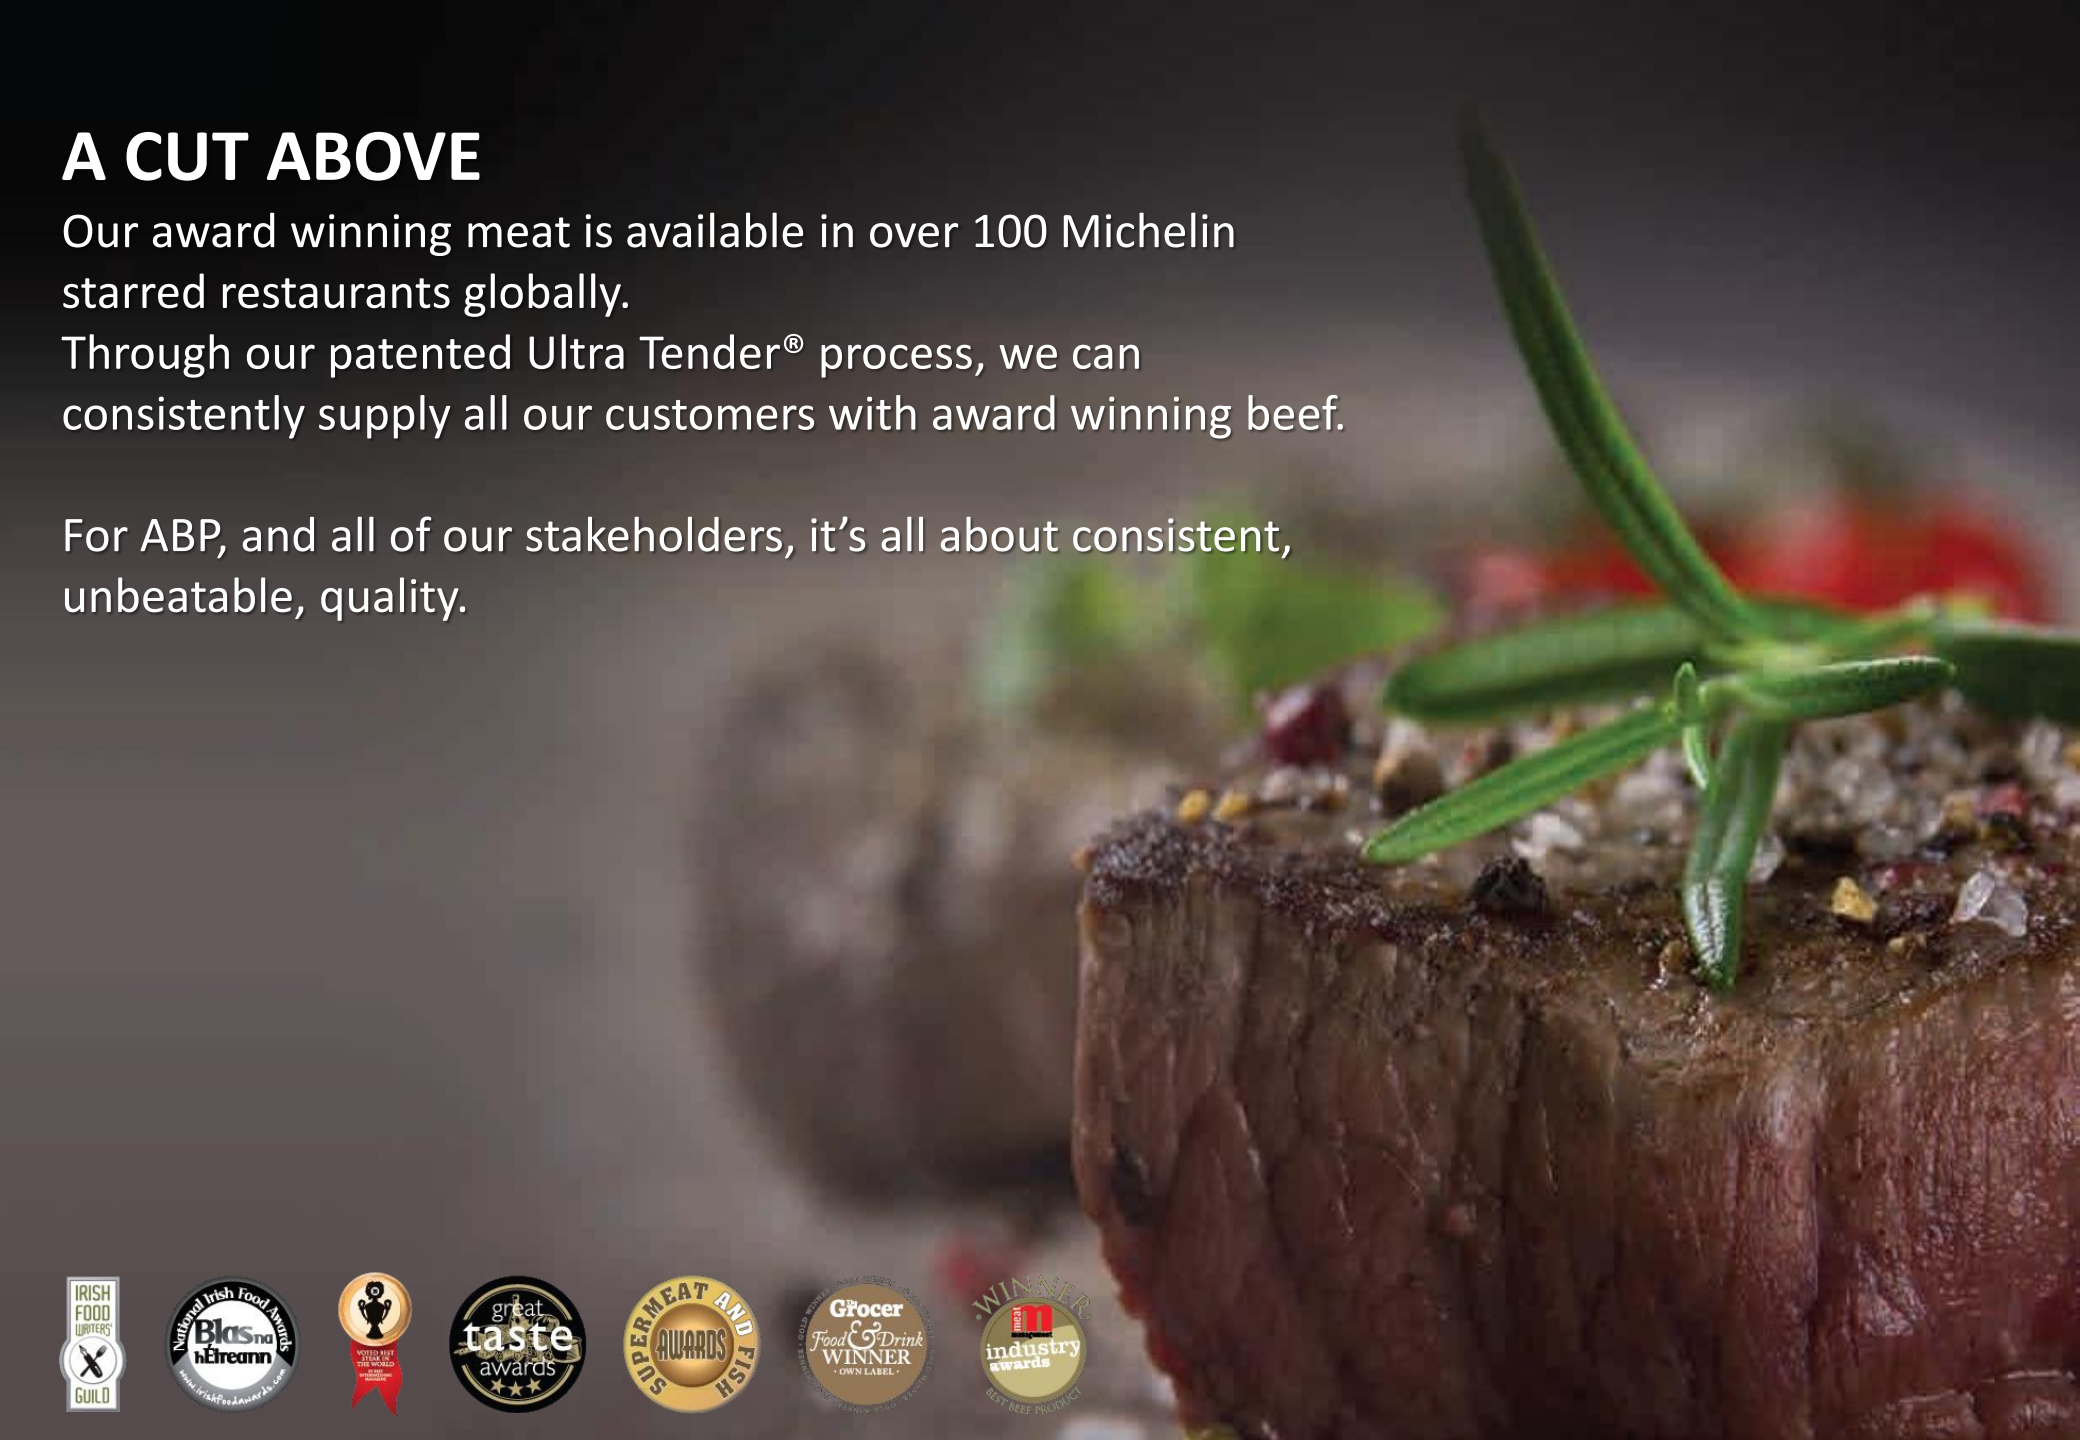
Through our patented Ultra Tender® process, we can consistently supply all our customers with award winning beef.

For ABP, and all of our stakeholders, it's all about consistent, unbeatable, quality.



Innovation : Food Industry Characteristics

- Varied & Complex Raw Materials
- Varied & Complex End Products
- Varied & Complex Processes
- Perishable (in many cases)
- Large Environmental Footprint

- Regulated
- Subsidised
- Sensitive

- Red Meat Companies: National & Fragmented
- Other Food Companies : globalised & consolidated

- Low Margin/High Volume

Innovation : Positive Developments

- EU Beef Decoupling Policy
- Dairy Quota's gone

- Commercially driven markets
- Supply Chain Consolidation

- Upgrading of Facilities
- Upskilling of Supply Chain Players
- More investment in Innovation
- National emphasis on Indigenous Industries

Innovation : Needs of Food Industry

Production, Processing , Distribution, Sale & Consumption

- Food Safety :
- Quality :
  - Palatability
  - Health & Nutrition
- Product Yield/Value : kgs & €
- Costs : Feed, transport, labour, materials & energy.
- Environment & Sustainability
- Traceability /Authenticity
